## About WINIR

Officially launched in October 2013, **WINIR is a global network** that brings together researchers from multiple academic disciplines to study the nature, function, evolution, and impact of institutions. WINIR places institutions at the centre of its research. WINIR's primary emphasis is on those institutions and organisations that deeply affect the production and distribution of wealth and the means of human well-being.

WINIR accommodates a **broad conception of institutions as systems of functioning social rules**. There are other varying definitions, but generally the idea of rules – involving rule-making and rule-following – is central. WINIR thus focuses on the making, following, contestation and evolution of social rules. Systems of rules can create regularities of behaviour, and enable, frame, constrain, expand or disrupt human cognition and action.

WINIR is devoted to the study of entities and actors including firms, states, markets, money, households, and other vital institutions and organizations that effect the production and distribution of wealth. It welcomes contributions from **all academic disciplines and all schools of thought** that can contribute to our understanding of these institutions and organizations.

These disciplines include anthropology, economics, geography, history, law, management, philosophy, politics, psychology and sociology. WINIR aims to create **fruitful and constructive dialogue** between these disciplines on institutional themes, and to try to develop a cross-disciplinary consensus on some key issues.

WINIR is also interested in the history and comparison of **institutional thought**, as it has evolved in different ways in several disciplines, including within the various “institutionalisms” that are found in economics, politics and sociology.

Also of vital importance are developments and comparisons of **methodologies of institutional research**, invoking data appraisal, historical insight, statistical technique and philosophical evaluation.

### **Leading pioneers of institutional research are Honorary Presidents of WINIR:**

**Elinor Ostrom (1933-2012)**

## Elinor Ostrom Prize

The **Elinor Ostrom Prize** has been established in honour of the late Nobel laureate Elinor Ostrom (1933-2012), who was an enormously creative scholar and an outstanding pioneer of the interdisciplinary field of institutional research. Her most famous work focused on the problem of managing and maintaining common-pool resources, but she also applied her ideas to problems of political governance and climate change. Her theoretical work on rules is of paramount importance. In her last decade she became increasingly interested in how rule-systems (or institutions) evolve. Elinor Ostrom's articles published in *JOIE* are among the journal's most-cited papers.

**A prize of £1000**, funded by Millennium Economics Ltd., (the owner of *JOIE*), is awarded each year for the best full-length article published in *JOIE* in the preceding calendar year.

### 2018 Ostrom Prize

For the 2018 Ostrom Prize the panel of experts, comprising Christopher Coyne, David Dequech, Thráinn Eggertsson and William Milberg, considered all full-length articles published in *JOIE* in 2017, and shortlisted the following five papers:

Benito Arruñada (2017) "Property as Sequential Exchange: The Forgotten Limits of Private Contract", *JOIE* 13(4): 753-783.

Michael Bleaney and Arcangelo Dimico (2017) "Ethnic Diversity and Conflict", *JOIE* 13(2): 357-378.

Hilton Root (2017) "Network Assemblage of Regime Stability and Resilience: Comparing Europe and China", *JOIE* 13(3): 523-548.

The winner of the 2018 Elinor Ostrom Prize will receive the award at the conference dinner.

## Conference theme

The twenty-first century will see major **disruptions to the global balance of politico-economic power**. China will soon become the world's largest economy; India is another rising giant. These and other developments – including growing inequality in several major economies – contest the Western institutional model of economic development and mount new institutional challenges at the global level.

There is a recognised need for new or enhanced international orders, to sustain peace and international trade, as well as to address the problem of climate change. Meanwhile, an extended period of global integration has fuelled local discontent and led to a rise of nationalism and separatism. **The international challenges of the twenty-first century place institutional development and reform at the top of the agenda.**

The Fifth WINIR Conference will explore these institutional challenges. The conference aims to provide a forum for leading scholars from multiple disciplines and theoretical approaches to advance the **ongoing conversation** about these and other key issues in the **growing area of interdisciplinary institutional research**.

## Keynote speakers

The **keynote speakers**, Justin Yifu Li and Chenggang Xu, have made substantial contributions to interdisciplinary institutional research. A common thread that runs through their research is the **influence of institutional and organisational arrangements on economic and political development**.

**Justin Yifu Lin** is the Director of the Institute of New Structural Economics and Honorary Dean of the National School of Development at Peking University (China). His research deals agricultural economics, development economics and economic reforms in China. He is the author of *Demystifying the Chinese Economy* (Cambridge University Press, 2012), *The Quest for Prosperity: How Developing Economies Can Take Off* (Princeton University Press, 2012), *New Structural Economics: A Framework for Rethinking Development Policy* (World Bank, 2012), and *Beating the Odds: Jump-Starting Developing Countries* (with Célestin Monga, Princeton University Press, 2017). He is a former Chief Economist and Senior Vice President of the World Bank. In 2012 Professor Lin was awarded the Pushan Prize by the International Economic Association.

### Keynote 2: “Long-lasting institutional genes: the case of China”

**Sunday 16 September, 16:15-17:30**

Chair: Katharina Pistor

Lecture Theatre 2

**Chenggang Xu** is Professor of Economics at the Cheung Kong Graduate School of Business (China). His research focuses on institutional and organizational economics, law and finance, financial regulation, economic development and transition, and the Chinese economy. He is the author of *A Different Transition Path: Ownership, Performance, and Influence of Chinese Rural* (Garland, 1995) and *China's Institution: Its Origin, Evolution and Comparison* (Cambridge University Press, forthcoming). He is a board member of the Ronald Coase Institute and a past president of the Asian Law and Economics Association. He has also served as consultant for the World Bank and the IMF. In 2016 Professor Xu was a co-recipient of the China Economics Prize.

For an online version go to <http://www.mtr.com.hk/en/customer/jp/index.php>.

Trams and an extensive bus network provide alternative means of travel around Hong Kong.

## Taxi

Taxis are plentiful throughout Hong Kong. They can usually be hailed on the street (except in restricted areas) or summoned by phone. All are metered, relatively cheap, air-conditioned and clean. Detailed information about charges is clearly displayed inside each cab. Most taxi drivers in Hong Kong understand some English and Putonghua. Taxis do not accept credit card payments.
