

# AI and Institutions

WINIR Young Scholars Workshop

## CALL FOR SUBMISSIONS

### EVENT HIGHLIGHTS

- ✔ We invite early career scholars working on theoretical and practical insights within the field of institutional theory related to the emergence of AI and the interaction between institutions and AI. Projects based in or relating to the Global South are of particular interest, as well as work related to or concerning the semiconductor, chip, or GPU industry.
- ✔ Accepted participants will be given priority consideration (subject to peer review) for publication in a special issue of the NYCU Law Review (has been included in HeinOnline) and the possibility to be invited for presenting at the 29th National Conference on Technology Law in November, 2025, Taipei.

Artificial Intelligence (AI) is profoundly transforming the global landscape, reshaping not only technological innovation but also institutional operations and social structures. This workshop seeks to critically interrogate the intricate and multidimensional impacts of AI across diverse institutional domains. Specifically, it aims to explore the intersections of technological advancements and societal structures through the lens of institutional theory, considering how AI both disrupts and reconstitutes organizational norms, practices, and frameworks.

### ELIGIBILITY

- Currently Enrolled Ph.D. Students
- Scholars within three years of earning their Ph.D.

### EVENT DETAILS

- **Date: May 17, 2025 (Exact time TBA)**
- **Format: Online**
- **Submission: English abstract of up to 500 words**
- **Deadline: December 31, 2024**
- **Submission Link:**
